TRAINING PROPOSAL Introduction to Welding – SMAW

Student Name: _____ Date of birth: _____

Phone number: _____ e-mail: _____

Street address: _____

City/State/Zip _____

COURSE INFORMATION:

Introduction to Welding – SMAW, Shielded Metal Arc Welding

The Introduction to Welding courses are designed to prepare the student for an entry level position within the workforce. The complete 100 hour courses have been divided into very specific learning modules which are designed to provide the student with the commonly required prerequisites for work within the welding and welding related occupations. SMAW is the correct industry name for shielded metal arc welding, sometimes known as “stick welding”. LVIW courses provide common jobsite required instruction and certification for CPR/First Aid, Forklift Operator, and OSHA 10 within all of our welding course curriculums.

Course start date:

Course end date:

Total program hours: 100 Classroom hours: 42 Welding lab hours: 58

Total hours of training per week: 25, Monday through Friday, 5 hours each day

Length of training in weeks: 4 Maximum class size: 12 students

There are no prerequisites. Students should obtain an eye test for vision acuity at 6-24 inches.

Welding can be physically demanding requiring fine motor dexterity and the ability to lift at least 50 pounds. At the present time we are offering classes for students 18 and over, but we anticipate the ability to offer classes to students 16-18 years old in the near future.

Program Costs:

Tuition: \$6000, includes \$150 registration fee

Textbooks, handouts, quiz and test copies, etc.: \$148

Tools: \$694.74

Equipment: \$741.50

Total Program Cost: \$7434.24

Our curriculum was developed with NCCER, (National Center for Construction Education and Research) in conjunction with (AWS) American Welding Society.
